In response to the Official Action of December 4, 2002, please amend the above-identified application as follows:

IN THE CLAIMS

Please amend Claim 34 as follows:

B' 34. (Amended) A method for the dehydrocyclization and/or isomerization of an aliphatic hydrocarbon comprising contacting the hydrocarbon at a temperature in the range of from 370°C to 600°C with a catalyst so as to convert at least part of the hydrocarbon into an aromatic hydrocarbon, the catalyst comprising a Group VIII metal and gallium-containing LTL
